

Your Turnkey Data Center Partner

WHAT IS A TURNKEY DATA CENTER PARTNER?

When you build a house, the general contractor is your one point of contact for the entire project. They are responsible for the day-to-day oversight of construction, management of vendors, and communication between all parties involved. A turnkey data center partner is like a general contractor. A turnkey data center partner is your one point of contact for the build and maintenance of your data center or critical systems.

WHO WOULD BENEFIT FROM A TURNKEY PARTNER?

Turnkey data partners are an all-in-one provider and would benefit everyone ranging from a completely new business that is starting from scratch or a business that is looking to completely overhaul its current systems. Regardless of the size of the business or application, there is a turnkey solution for you.

DIVERSE PRODUCT OFFERINGS

As a turnkey partner, we can provide a variety of solutions to meet your specific needs. We have built strong relationships with a diverse portfolio of partners to provide you with choices. Our product offerings include backup power, enclosures, power distribution, heating and cooling, monitoring, software, service, and so much more.

No matter what you need, PTI has a solution for you.

PTI is a turnkey data center partner for businesses in all industries. Let us provide you with peace of mind and be your trusted advisor.
