

REVOLUTIONIZING FACILITY MANAGEMENT: THE POWER OF A PRIVATE FACILITIES NETWORK

This parallel network provides separation between the corporate network and the facilities team and allows each department to operate more efficiently, while minimizing the risk of outages.

Facility Network

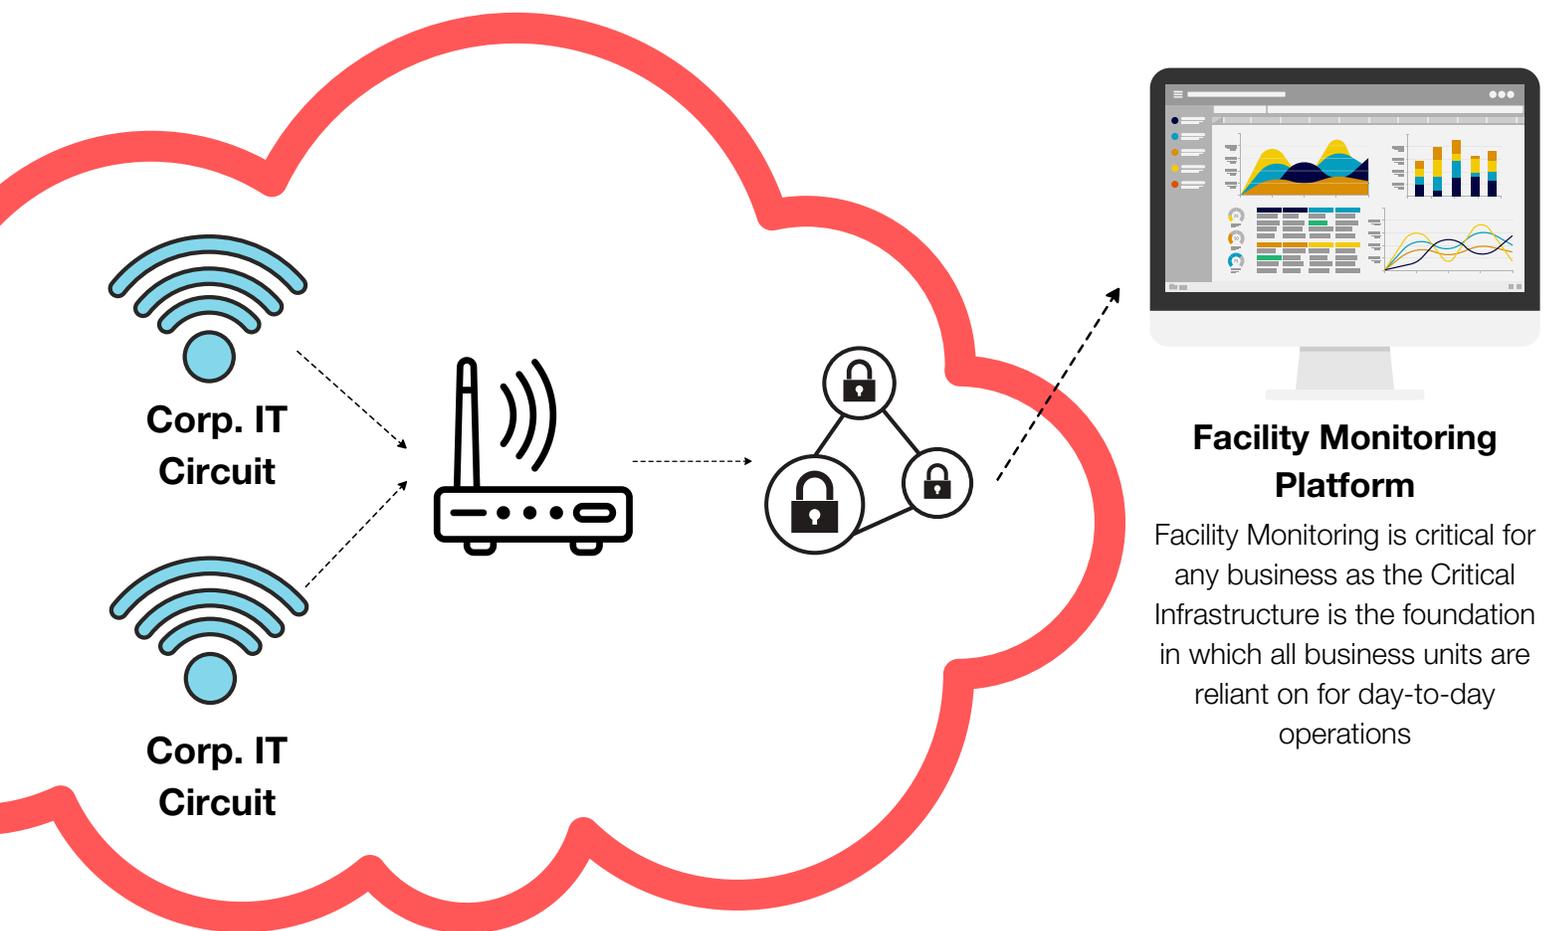

Corporate Network

BENEFITS

- A dedicated, redundant network can be installed in weeks
- Add/Moves/Changes done in hours/days compared to weeks/months
- Secured Network - separate from the corporate network
- Ease of deployment for multiple sites
- Corporate outages/network changes will not affect the facility monitoring platform
- Single point of contact with managed security service provider for issues/troubleshooting

TYPICAL CORPORATE IT INFRASTRUCTURE

Facility Monitoring Platform

Facility Monitoring is critical for any business as the Critical Infrastructure is the foundation in which all business units are reliant on for day-to-day operations

PAIN POINTS W/ CORPORATE NETWORKS

- Facilities are looked at as a customer and not part of the organization.
- Long runway for new deployments
- IT incidents impact facilities and the ability to see critical infrastructure
- Reliant on Corporate IT for hardware management, adds, moves, and changes
